

PETITION

To the Legislative Council of Victoria

The Petition of certain citizens of the State of Victoria draws to the attention of the Legislative Council the need to ensure that existing laws relating to abortion are not out of step with community sentiment and current clinical practice.

The petitioners therefore request that the Legislative Council of Victoria support the passage of a prospective Bill to decriminalise abortion in a way which achieves both the safeguarding of women and medical practitioners and ensure that services are high quality, accessible and safe. This will ensure that the law reflects contemporary community standards and that it is simple, clear and transparent.
